Leather Pulls

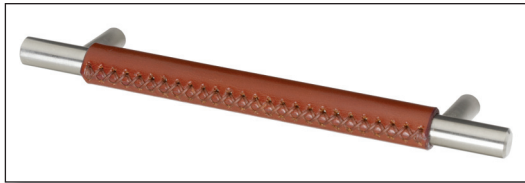

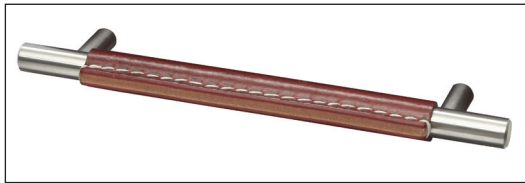

Hardware doesn't have to be hard any longer...introducing an exclusive line of leather-wrapped door and drawer pulls that will make opening doors a warm and tactile experience. Our pulls feature hand-applied and stitched saddle leather in a variety of leather styles, colors and stitch patterns. The luxury of real leather combined with individual craftsmanship provides a signature touch for hospitality, corporate, retail and residential projects.

We offer a range of standard door and drawer pulls, all of which may be further customized. We can work with designers to restyle our standard pulls or to create a unique pull for your very special project.

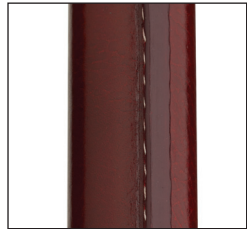

Our door pulls feature heavyweight 1 1/4" diameter solid steel rod with flat or round ends, in straight or offset style, as well as closed-loop options, in three standard finishes and a wide range of leathers. Drawer and cupboard handles are 1/2" diameter, from 6" to 48" in length.

This collection of leather-wrapped pulls works beautifully when combined with other natural materials. Of course the door pull leather may match leather floor and wall tiles and upholstery leather for a totally coordinated look....good design is in the details!

Contact your C. C. Leathers Inc. Representative for more ways that we can assist you in customizing your projects!
