## Leather Wall Panels

*Leather walls make any interior luxurious and unique. The rich and lustrous patina of leather as well as the seductive aroma gives a sophisticated image unequalled by other materials.*

### Leather-Wrapped Panels:

Wood panels are wrapped in any of our many different styles of leather. The leather is stretched over the front and sides and glued to the back surface. A foam underlay, in several thicknesses, may be added for a softer, more tactile feel. Another version features smaller leather panels inset into various styles of frames, available in any type of wood. Standard and custom sizes and shapes are available.

### LeatherTile Wall Panels:

LeatherTile is a thick, solid veg tan leather that can be used for vertical or horizontal application—a beautiful and elegant treatment for floors, walls and furniture. Stocked in 7 colors in large sections of approximately 10-12 square feet, these may be cut to any size or shape. The leather is flexible and can be wrapped around edges, stairs or columns. Custom colors are available with a minimum order of 500 sq. ft.

### LeatherLok:

A large-scale, woven leather look in virtually any style of leather. Two widths of strips, 2 5/8" and 1 5/8" are available, forming modules that easily go together to create a seamless appearance. Individual strips may be different leather colors and are also available in plain wood veneer and solid cast aluminum. See the LeatherLok brochure for more information.

**Any size, any shape, any leather...**Cover an entire wall or just a focus wall behind a reception desk. Whatever your requirement, we can provide leather wall products to make your project look fabulous!

Please call your Rep for flammability classifications.

**CCLI – More than just leather!**
